# inCytex™ SHARE YOUR STORY

Healthcare is about telling stories. Patients telling stories to doctors, doctors sharing stories with colleagues, and organizations building stories around their brands. The most effective stories are grounded in facts, and in today's modern world, such evidence has never been easier to discover.

inCytex™ is a clinical evidence application, yet it so much more. Through its engaging interfaces, user-specific experiences, and social collaboration, inCytex™ is a tool for building and sharing stories.

## WHAT MAKES INCYTES™ UNIQUE?

Every feature you'd expect, and a few you didn't.

### inCytex™ Circles

Securely and selectively share evidence across a diverse userbase.

### Patient Portal

Engage and inspire patients through real-time progress reporting.

### Outcomes Alerts

Instantly identify and react to abnormal results or outcomes.

### Enrollment & Consent

Patients enroll themselves, so you don't have to.

### User Experience

Improved experiences for all, integrated evidence for you.

## Seeing is believing
